THE GREAT SERVER CLOSET INCIDENT OF 2026

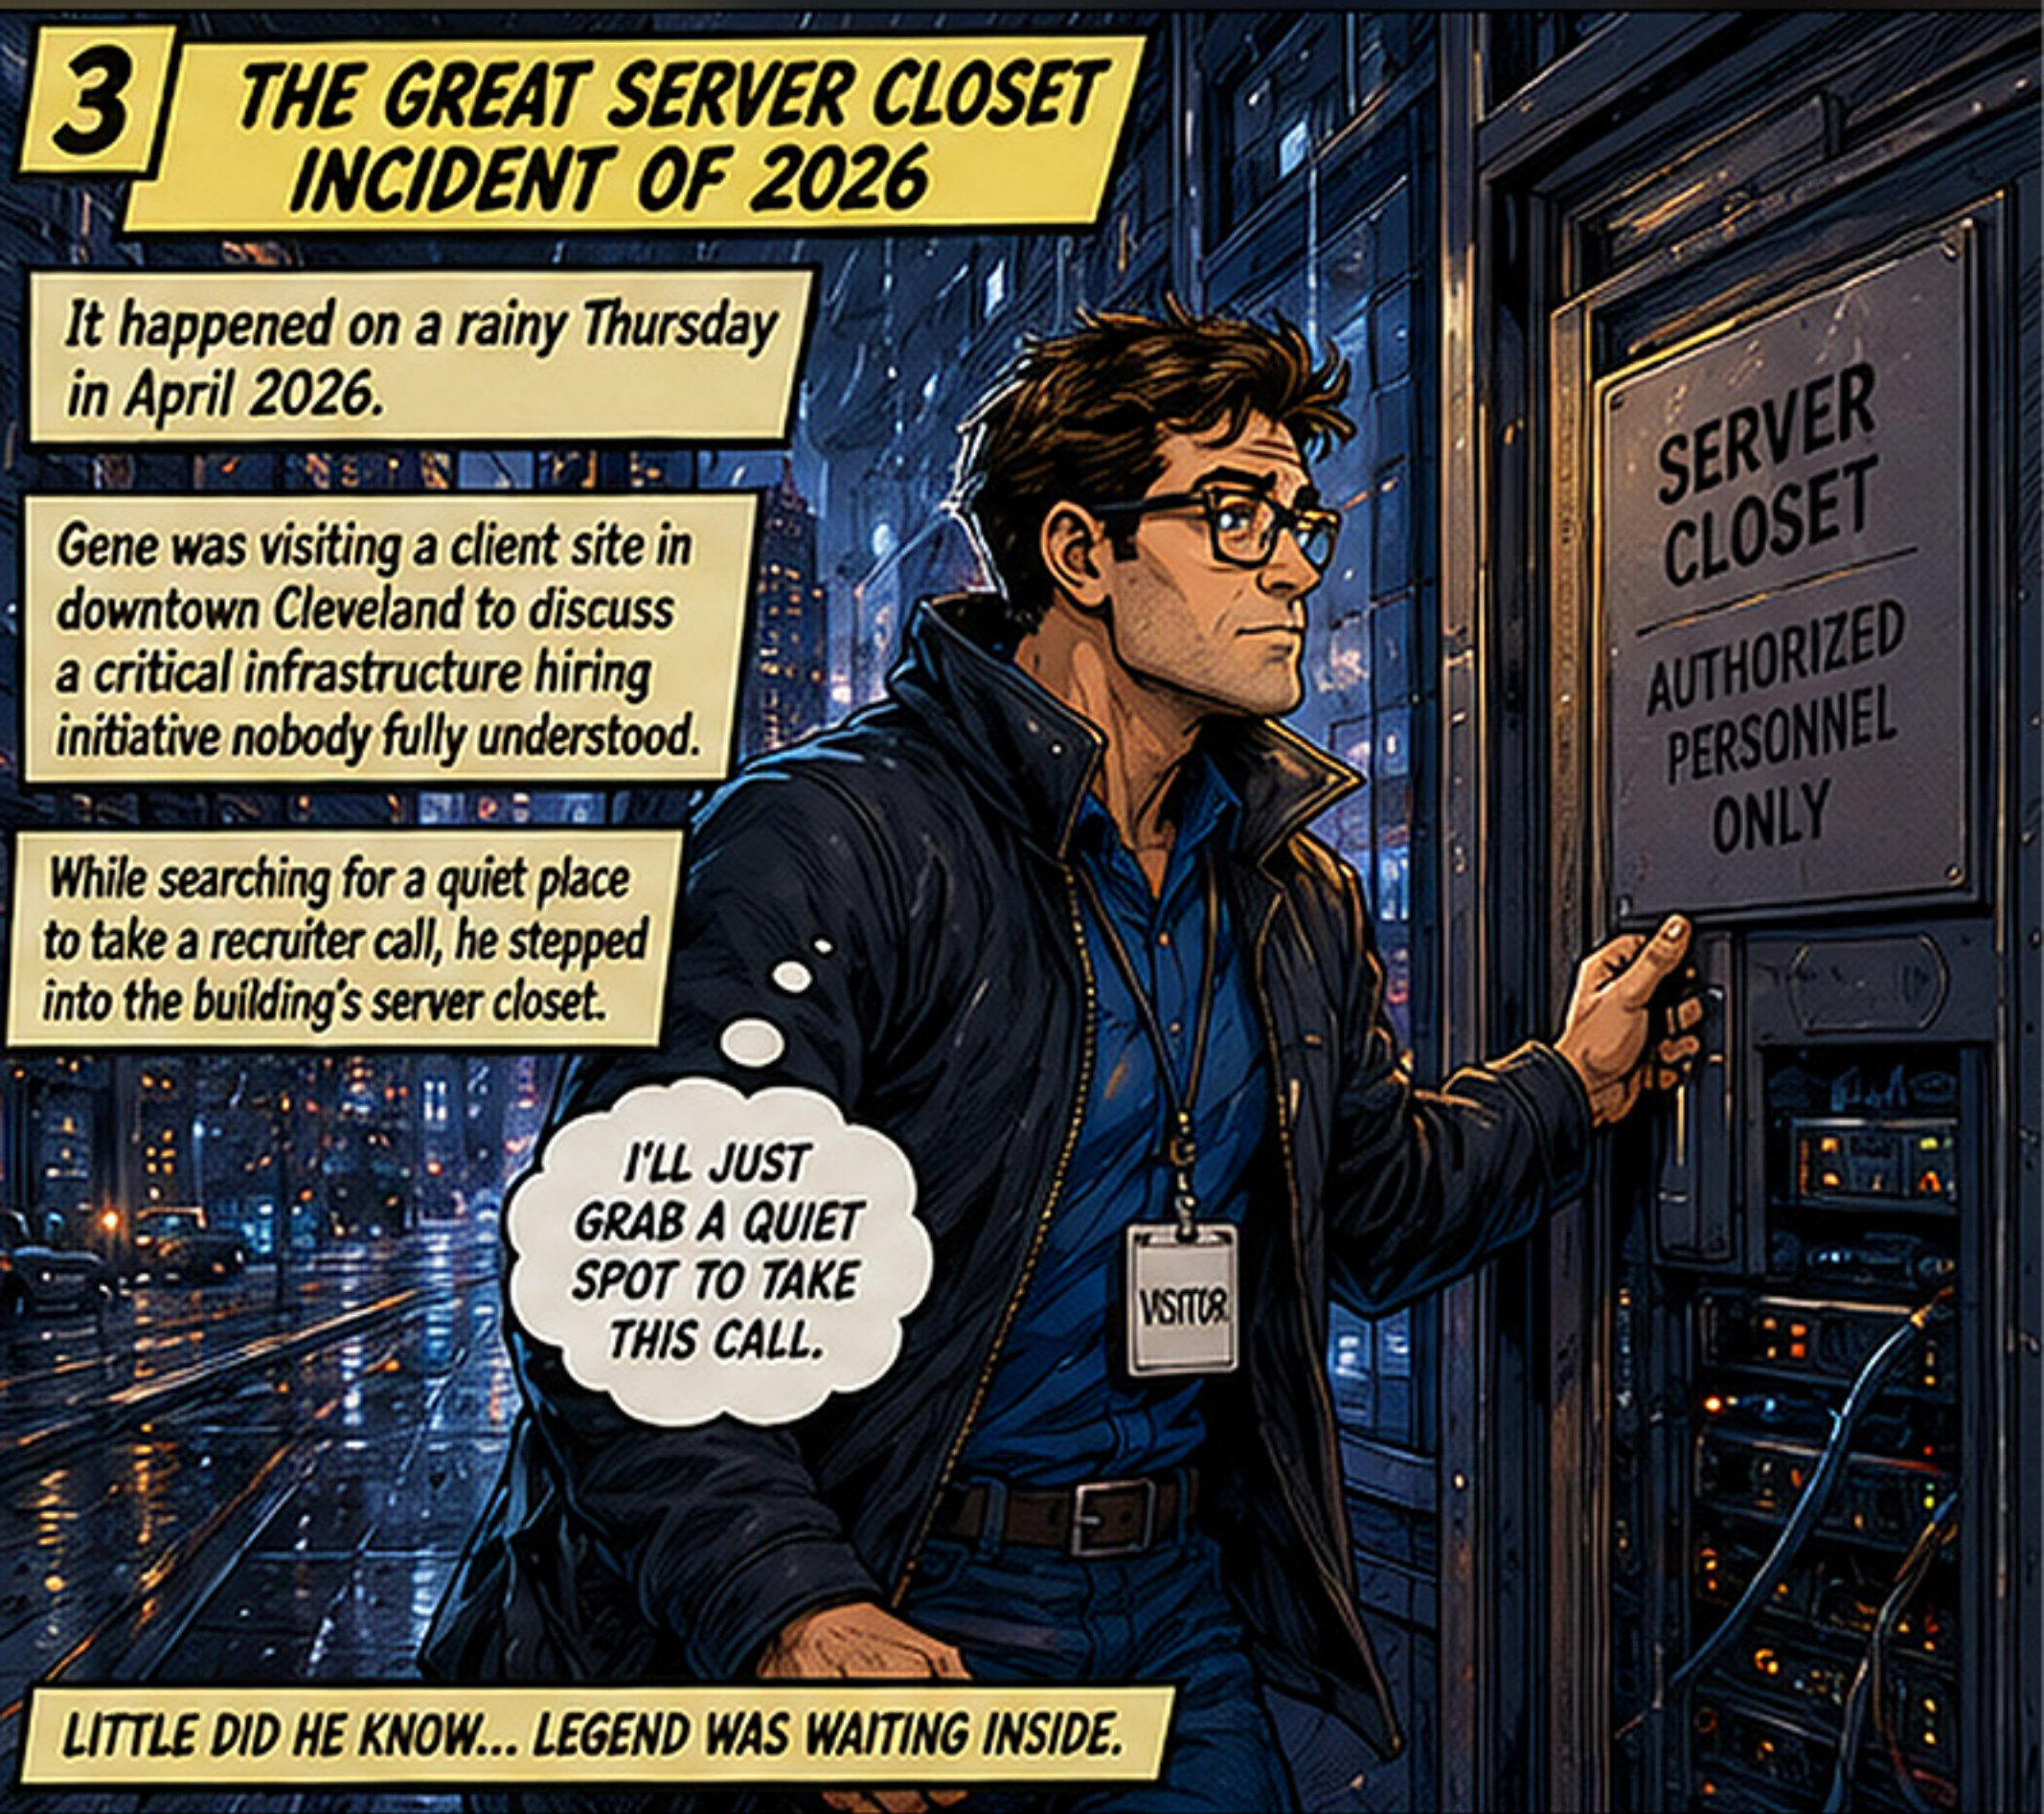

It happened on a rainy Thursday in April 2026.

Gene was visiting a client site in downtown Cleveland to discuss a critical infrastructure hiring initiative nobody fully understood.

While searching for a quiet place to take a recruiter call, he stepped into the building's server closet.

**I'LL JUST
GRAB A QUIET
SPOT TO TAKE
THIS CALL.**

LITTLE DID HE KNOW... LEGEND WAS WAITING INSIDE.

INSIDE, THREE CATASTROPHIC FORCES CONVERGED:

1

A LIQUID-COOLED
AI SERVER RACK
OPERATING FAR
BEYOND SAFE
TEMPERATURES.

TEMP:
102°C
(DANGER)

2

AN OVERLOADED
WIRELESS LAN
CONTROLLER NAMED
"SKYNET_FINAL."

LABELED:
"MAXIMUM FOCUS:
